

## NATURALISTE U3A COVID-19 SAFETY PLAN

This following plan is to be used in all premises in which Naturaliste U3A courses are undertaken.

- Vaccination:** All participants will be required to be fully vaccinated and able to show proof of vaccination. Demonstrating proof of vaccination or medical exemption will be in either of two ways:
  - Show your vaccination certificate through ServiceWA or Express Plus Medicare apps.
  - Show your vaccination certificate either digital or printed with suitable ID, such as a Drivers Licence.
- Building entry/exit:** On entry and exit to building, participants are required to exercise social distancing principles until premises are available for entry. This could involve waiting outside or in cars until advised that premises are available. Course participants will be admitted in accordance with the rules relating to the premises being entered.
- Hand hygiene:** Alcohol-based sanitising lotion and/or hand washing should be available at the premises being attended by course participants.
- Physical distancing:** Chairs should be placed at points respecting the 1.5m distance rule.
- Support items:** Participants should bring their own support items e.g., stationery and other items used during their course. Items should not be shared unless it is possible to sanitise them.
- Illness and Response:** In agreeing to participate in the course, participants have committed to complying with WA Health Department requirements. Participants should not attend if they have any symptoms or have been in contact with anyone who has symptoms or showed signs of symptoms. Should any participant attend showing symptoms, that participant will be discreetly invited to discuss their situation with the Course Leader, and if thought appropriate, encouraged to leave the premises.
- Attendance:** An attendance record including name/contact/dates/venue/duration information should be maintained by the Course Leaders.

Participants are to observe any additional COVID-19 rules required by the premises where the course is conducted.
